

ACQUIRED DATA SOLUTIONS

TURNING DATA INTO ACTION

DATA ACQUISITION • ANALYSIS • REPORTING

For the past twenty years, ADS has been providing leading edge engineering test and evaluation solutions to government agencies and the private sector. Our expertise in data acquisition, testing and monitoring has made us invaluable to customers requiring solutions to improve their development environment, manufacturing process and product system quality. Our ability to emulate unique test environments allows our customers to solve complex problems in the developmental and operational phases prior to manufacturing, field testing, and deployment.

ACQUIRED DATA SOLUTIONS

TURNING DATA INTO ACTION

SERVICES

- Engineering Services
- Spectrum Measurements
- Threat Management

PRODUCTS AND SOLUTIONS

- Acoustic/Vibration Sensors • Light Sensors
- Spectrum Fidelity ZX™ • Drone Detection
- Test Data Management • Vision Systems
- XY Plotter (Automated Test) • Cyber Physical Test Bench

SOFTWARE EXPERTISE

- C/C++ • Java/Java Script • LabVIEW
- LabWindows/CVI • Linux • .Net • .XML
- MS Access and SQL Server • Visual Studio

INDUSTRIES/DOMAIN EXPERTISE

- Aerospace • BioTech/BioMedical • Defense
- Cyber Security (IOT, IIOT) • Manufacturing
- Government • Medical Devices • Energy
- Utility • RF & Wireless Telecommunications
- R&D Laboratories

THREAT SURFACE SOLUTIONS

ADS is also committed to protecting critical infrastructure through our Threat Surface Solutions Group. Our team of threat intelligence, cyber security, risk mitigation, and penetration experts have an unparalleled track record of success working with our nation's most critical national security and defense agencies. With a focus on surface threat, we are uniquely qualified to help protect IOT, IIOT, and critical infrastructure with a holistic approach to cyber physical security.
