

CAPABILITIES STATEMENT

Acquired Data Solutions has over 20 years' experience providing Automated Test & Measurement and Command & Control Solutions for the Engineering Life Cycle. Our expertise includes Functional, Operational and Cybersecurity testing of integrated technologies in systems and devices that span across Aerospace & Defense, Critical Infrastructure, Transportation, IOT, Medical and Food & Beverages.

CORE COMPETENCIES

Our mission is to provide the highest quality customer experience and solutions to meet our customers critical needs and ensure Safety, Security, Survivability and Evolvability; **CYBER RESILIENCY**.

SERVICES

- Software Development
- Test & Evaluation
- Functional & Operational Test
- Cybersecurity

PRODUCTS

- RF • Optical • Temperature • Sensors
- Vibration • Acoustic • Drone
- Cybersecurity • Inspection Systems

CERTIFICATIONS & CODES

Duns Number: 004014921

Cage Code: 1LEB3

PAST PERFORMANCE

- Risk management and CMMC Compliance.
- Test and evaluation on airport security equipment (passenger screening & check baggage).
- Defense Laboratory Automation.
- Medical Laboratory Testing & Automation.
- Functional & Operational test for real-time simulation; NIST Net Zero Energy Home.
- Real-time functional RF test for radar development.
